

Rubbish RoundUp!

The global waste development landscape in
December 2013

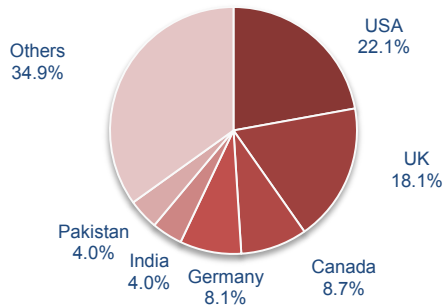

149 new projects reported this month including...

- A new US\$15 million metal shredder project in New York state, USA.
- Facilities to contain over 130,000 tonnes of radioactive waste from the Fukushima nuclear reactor in Japan.
- A new waste management and recycling facility in northern France with annual capacity of 100,000 tonnes.
- A new biomass cogeneration plant in Wiesbaden, Germany, operated by ESWE Bio-Energie.
- A new waste sorting centre in Granby, Quebec, in Canada, to deal with 21,000 tonnes of household waste per year.

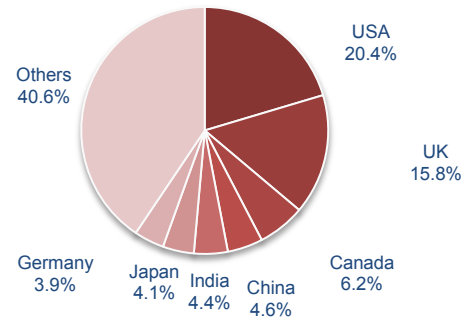

Statistical highlights for December 2013

- 149 new waste projects identified in December, with a total identifiable value of US\$6,026 million. This brings total projects for 2013 to 1,447, with a total value of US\$87,120 million.
- The USA accounted for 33 new projects in December, taking the US total to 295 for the year. In value terms, the USA accounts for US\$19,062 million in 2013, of which US\$681 million was in December.
- The UK remains the leading country for project value however, at US\$24,792 million in 2013. Of this, US\$2,549 million was in December.
- Waste-to-energy is the leading facility type, with 871 projects in total, of which 79 were recorded in December. WtE projects account for US\$65,711 million in 2013, of which US\$3,716 million was in December.
- The average value of a waste project in 2013 is US\$125 million. For WtE projects the figure is a little higher at US\$145 million, although this often includes ongoing operating costs.
