

Tuesday 9th September 2014; 14:00 - 16:00

ISWA special session – Resource Management

SESSION MODERATOR

Antonis Mavropoulos, STC Chair

The session will act as a kick off for the work of the ISWA Task Force (TF) on Resource Management. The future work of the newly formed task force will concentrate on the contribution, challenges and transition for the waste management sector on Resource Management and the Circular Economy. This session will highlight insights and experiences gained from recent works of a number of leading organisations in the field of Resource Management. The interactive discussion is hoped to draw out new international thinking on how resource management and the circular economy can be driven forward by the waste industry.
