CIRCULAR ECONOMY OPPORTUNITIES IN MALAYSIA

The shift from a linear to a circular economy is a major challenge that requires a strong commitment to sustainable management of waste and resources. Therefore, to achieve a sustainable solid waste management through this, we need to reduce the waste to minimum by reusing, repairing, refurbishing and recycling existing materials and products. Hence, less waste are generated through the development of sustainable products with greater recycling capacities indirectly will reducing landfilling to a minimum. The event brought together leaders, policymakers, experts and enthusiasts around the world to share their experiences and knowledge focusing on circular economy from the waste management aspect.
